

## AUTOMATIC METER READING SOLUTIONS

The DLMS meter reading application runs on Android mobile devices. It is an effective and efficient meter reading solution for DLMS meters (IEC-62056) & Smart meters (IS-16444). This application supports reading and real-time viewing of field meter profiles, data view, programming the meter, smart meters connect/disconnect. This is also a solution to address the last mile connectivity issues - where the AMR and AMI networks failed due to a network problem.

## FEATURES

- SANDS DLMS meter reading application is an effective solution for reading, configuring and controlling the DLMS meters
- Simple and user-friendly GUI
- Supports all leading meter manufacturers DLMS meters (Tested with 30 makes of both single-phase and three-phase meters).
- Real-time data profile view, using compact BCS supports both graphical and tabular report formats.
- Compliant to IS-15959 / IEC-62056 – Part 1, Part 2 standard
- Supports both online and offline mode (Poor network connectivity and network unavailable instances) – data shall be stored in the device memory, user can upload the offline data when the network connection resumes
- Hardware for communication – Universal optical cable with USB,OTG port setup shall be provided
- GPS locations of meters recorded automatically while reading meters (Optional)
- Secured server communication for
  - License registration and version updates
  - Login authentication
  - Data dumping to MDAS / MDM servers
  - Downloading/uploading of meter, customer information for smart meter connects / disconnect features
- On-field instantaneous analysis using compact BCS supports the following profiles, by selecting the data files from internal/external storage
  - Nameplate and programmable
  - Instantaneous data and phasor view
  - Billing (Present and history data with TOD values)
  - Load survey (Tabular and Graphical view)
  - Tamper events
  - Transactions
- Compatible with the following Android Versions
  - Android V6.0 ( Marshmallow )
  - Android V7.0 ( Nougat )
  - Android V8.0 ( Oreo )
  - Android V9.0 (Pie)
  - Android V10.0 (Q)
- Protocols Supported for data upload/download
  - TCP/IP, HTTP , HTTPS , FTP, MQTT( Optional )
- Data formats supported
  - JSON, TXT, CSV

- The communication between the meter and the mobile device is bi-directional, through USB optical probe + OTG cable.
- The application collects the meter data based on user input and stores the data in the device's memory.
- Mobile to cloud server communication for uploading / downloading the data is through secured web services (HTTP, FTP).
- Mobile to local server communication for uploading / downloading the data is through USB data cable.
- Based on the solution package chosen by the
