

Case Study

12.5 Percent Increase In Plant Efficiency With Enms At Asian Paints

Case Brief

Since PPG Asian Paint's inception, sustainable operations have been a hallmark of who they are and how they do business. They strive to develop and execute Environment, Health and Safety (EHS) programs that ensure their processes are as safe and efficient as possible. They are committed to using resources efficiently to conserve the environment. The company's EHS policy guides the way they manufacture, market and distribute their products worldwide in such a manner that it protects our people, neighbours, customers and the environment.

- Cloud based dashboard, which helps the headquarters monitor their plants and their productivity.
- Improved plant efficiency with line level data analytics.
- Dashboard for real time Plant Scheduling & decision making at the plant level.
- Automated daily Energy Reports to senior management .
- Data to compute the Energy Costing per litre.

About Us

Signals & Systems (India) Private Limited, known by the brand name SANDS, is primarily a technology company, developing and manufacturing niche-technology products using embedded technology for the Industrial segments, Generation, Transmission & Distribution segments of the Power Industry. On the Services front, we specialize in Meter Data Analytics for Power Distribution companies, to curb energy thefts and help in revenue protection. We also undertake online testing of energy meters on behalf of the utilities as part of the regulatory requirements.
